1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, disclose, or suggest the claimed limitations of (in combination with all other limitations in the claim), a recording control apparatus for controlling recording of images in a recording medium comprising an accessing unit that accesses a recording medium, the recording medium storing a plurality of reproducible images and a reproduction instruction file containing instruction information including a plurality of file names specifying images to be reproduced, the reproduction instruction file being separate from the plurality of images, and further comprising an indication section for indicating deletion of an image in accordance with a manual operation whether or not the indicated image is instructed to be reproduced by the reproduction instruction file, and a control section for deleting the instruction information in the reproduction instruction file corresponding to the image indicated by the indication section to be deleted if the instruction information corresponding to the image is stored in the reproduction instruction file, and for retaining the instruction information corresponding to the images that have not been indicated for deletion as claimed in claim 88. Similar features are claimed in claims 92 and 93. Therefore, claims 92 and 93 are allowable over the prior art of record for the same reasons.
